

Muhammet Enes Gül

Date of birth: 19/06/2002 | **Phone number:** (+90) 5536652829 (Mobile) | **Email address:** enesgull@hotmail.com | **LinkedIn:** <https://www.linkedin.com/in/menesgul/> | **Medium:** <https://medium.com/@menesgul> | **Github:** <https://github.com/menesgul> | **Address:** Istanbul, Türkiye (Home)

● ABOUT ME

Focused on scalable system architecture and performance optimization, I aim to build robust backend solutions that power exceptional user experiences. Dedicated to continuous growth in backend engineering, I thrive on solving complex technical challenges and delivering reliable, high-performance systems.

● WORK EXPERIENCE

ANDROID DEVELOPER INTERN – SERRASOFT YAZILIM – 10/2024 – 02/2025

- Developed Android mobile application using **Kotlin** and object-oriented programming principles with modern development frameworks.
- Integrated **Firestore SDK** including Realtime Database, Authentication, and Cloud Storage for data management and user operations.
- Implemented **Google Maps API** integration for real-time geolocation tracking and interactive mapping functionality.
- Built **QR code recognition and generation modules** using specialized libraries for automated identification.
- Designed dynamic UI components with real-time status indicators for state management.

BACKEND DEVELOPER INTERN – VENTURA BT – 08/2025 – 09/2025

- Developed and maintained backend services with **Java & Spring Boot**, applying MVC principles for scalable enterprise systems.
- Implemented **API design, caching, and rate limiting** strategies to optimize performance in high-traffic environments.
- Contributed to the **architecture and functionality** of an internal portal serving 5,000+ active users.

PART-TIME ANDROID DEVELOPER – PAYLISHER – 09/2025 – 10/2025

- Developed mobile application features using **Kotlin** within the Android ecosystem.
- Contributed to the design and integration of a **marketing analytics SDK**, ensuring reliable data tracking and reporting.
- Collaborated on **Android app development** tasks, focusing on performance and user experience improvements.

WEB DEVELOPER INTERN – ISTANBUL AYDIN UNIVERSITY WEB DEPARTMENT – 12/2025 – 12/2025

- Performed scheduled maintenance on the university's official website, ensuring continuous availability, optimal performance, and full compliance with institutional standards.
- Updated and managed web content, including academic announcements, departmental pages, and visual assets, in alignment with communication guidelines.
- Collaborated with the web development team to implement UI/UX improvements and resolve technical issues detected during routine quality checks.

- Managed and maintained the institution's websites and mobile applications, overseeing content updates, technical operations, and ensuring compliance with user experience (UX) and accessibility standards.
- Administered web-based notification systems and digital communication infrastructures, ensuring effective dissemination of announcements and institutional communications to target audiences.
- Provided technical support for digital platforms, monitored system performance, conducted error analysis, and contributed to continuous improvement and optimization processes.

PROJECTS

2025 – CURRENT

AI-Supported Mobile Micro-Interactions for Individual Carbon Footprint Tracking Project Lead | TÜBİTAK 2209-A Undergraduate Research Project | 2025 – Present

- Led a 4-member team developing a cross-platform carbon footprint tracking app using React Native, Node.js/Express, Firebase, and Python-based AI services.
- Designed end-to-end architecture for tracking transportation, food, and product emissions through REST APIs, Firestore data models, personalized profiles, and dashboard analytics.
- Implemented AI-assisted food recognition and receipt/product analysis workflows with confidence-based prediction handling, user confirmation, and emission-factor mapping.
- Coordinated technical development, API integration, testing, literature review, and project planning as the TÜBİTAK 2209-A project lead.

07/2025 – 07/2025

Event Ticket Platform

- Used @PrePersist and @PreUpdate JPA hooks for **automatic timestamp management** and entity lifecycle tracking.
- Configured environment-specific properties and profiles to support **multiple deployment contexts**.
- Engineered QR-coded ticket generation and built an API endpoint for mobile-side **validation**, including logic to detect and reject duplicate uses.

06/2025 – 06/2025

Task Tracker App

- Developed a task management application using Spring Boot, following a layered architecture and RESTful API principles.
- Designed immutable DTOs using Java 21 record types, and implemented manual mapping between entities and DTOs.
- The application supports CRUD (Create, Read, Update, Delete) operations for task lists and tasks.

EDUCATION AND TRAINING

09/2021 – 06/2026

BACHELOR'S DEGREE IN COMPUTER ENGINEERING Istanbul Aydin University

- %100 Scholarship - 3.38 GPA
- Activities and societies : Google Developer Student Club / Team Member

09/2016 – 06/2020

HIGH SCHOOL Giresun Science HighSchool

SKILLS

Java | Spring Boot | MySQL | React.js | Firebase | Docker | Postman | Layered Architecture | Spring Security - Jwt | Swagger | Rate Limiting

LANGUAGE SKILLS

Mother tongue(s): **TURKISH**

Other language(s): **ENGLISH**

● VOLUNTEERING

07/2022 – 09/2022

Volunteer Basketball Coach – High School Team

● CERTIFICATIONS

Meta - Introduction to Android Mobile Application Development

HackerRank - SQL (Basic-Intermediate-Advanced) Certificates

HackerRank - Java Certificate

TechCareer : Code Crunch: JavaScript Essentials Workshop
